## PROJECTS

---

### NEWS WEB APP

JAVASCRIPT, CSS, REACT JS, EXPRESS JS, NODE JS, REST API

- Developed a high-performing news website using React, Express, and Node js with enhanced user experience.
- Featured advanced techniques such as Context API, Memo, and HOCs, to optimize 100% data utilization of articles.
- Implemented login and sign up features using bcrypt for password hashing and JWT token.

### PERSONAL PORTFOLIO

JAVASCRIPT, BOOTSTRAP, REACT JS

- Created a personal portfolio webpage to showcase my skills, projects and my tech interests during my 4 year B.Tech.
- Implemented react bootstrap along with react in order to improve the design and visuals of the portfolio.
- Used react js with advance techniques and deployed on netlify successfully.

### EVENT BUZZ

JAVASCRIPT, CSS, EMAIL JS, REACT JS

- Designed an event planning website to facilitate the smoothness of event planning process upto 2 minutes.
- Used third party service provider email js to added functionalities like getting mail from users for the service requests.
- Worked in a team of two in college tech club and learned about sharing responsibilities and understanding each other.

### RED POSITIVE

JAVASCRIPT, CSS, REACT JS

- Completed a freelancing project successfully for the company named REDPOSITIVE in around 5 days.
- Developed a clone website in order to improve designing and the functionalities of the website.
- Solved the major issue, that is the responsiveness of their website and did it with clean code.
